

Hazardous Materials Operations Level Training

For First Receivers

First Receivers typically include personnel in the following roles: Clinicians and other staff who have a role in receiving and treating contaminated victims and those whose roles support these functions.

Major Course Topics

- ❖ OSHA and EPA regulations
- ❖ An understanding of what hazardous substances are, and the risks associated with them in an incident
- ❖ Knowledge of the basic hazard and risk assessment techniques
- ❖ Know how to select and use proper personal protective equipment provided to the First Receiver
- ❖ An understanding of basic hazardous materials terms
- ❖ Know how to implement basic decontamination procedures
- ❖ An understanding of the relevant standard operating procedures and termination procedures

This class is designed to provide First Receivers with practical information to assist them in the receipt of contaminated victims.
